

# International Workshop on Astronomical X-Ray Optics

International Workshop on Astronomical X-Ray Optics is focused on presentation and discussion of recent and future technologies for future X-ray astronomy missions and current results. The sessions are focused on several topics:

- X-ray Astrophysics
- X-ray Optics
- X-ray Missions

The sessions are focused on astrophysical aspects of X-ray telescopes/satellites as well. The leading scientists will give some talks from the listed fields.

**DECEMBER 02 - 06, 2019**
