Conference Highlights

Suggestions for AXRO2020

- Invite representatives of X ray optics/telescopes projects which never attended our workshop ... suggestions welcome.
- Invite more people from laboratory/synchrotron X ray optics community and from industry? This year not very successful.
- Session on X ray test facilities (H. Brauning: The measurements are the key)

Suggestions for AXRO2020 II

- **Project splinter sessions such as ATHENA**
- **More missions?**
- **Detector session? See some posters/talks this year**
- **4 days conference works better than just 3 days**

**Thanks for coming, have
a safe trip home and see
you next time for
13thAXRO2020
Dec 7-11, 2020**
